

a GUIDE TO COPYRIGHT & CREATIVE COMMONS

Becoming Copyright Aware

Technology makes it easier than ever to reproduce, create and communicate content. This ease of production and reproduction means we must all be aware of our rights and responsibilities as content creators and content consumers.

Traditional Copyright

Work cannot be used, adapted, copied or published without the owner's permission.

All original work is protected under copyright when it is created.

Creative Commons

Work may be used without permission but only in accordance with the rules set by the licence.

Work that the creators have chosen to licence under Creative Commons

Public Domain

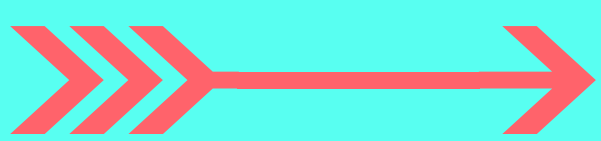

Work can be used, adapted, copied and published completely without restrictions, no permission needed.

Copyright expires 70 years after the death of the creator or date of publication. Some work is immediately placed in the Public Domain.

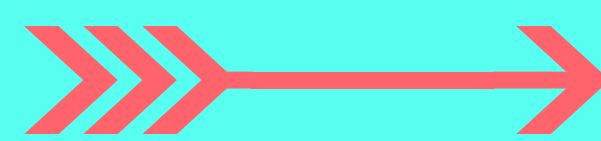

It's a spectrum?

All rights reserved

Some rights reserved

All rights waived

Creative Commons is not anti-copyright, but allows users to put rights on a spectrum.
